JAQUELINE LAPA SUSSMAN, author, therapist, lecturer, is one of the world's leading practitioners in the field of mental imagery empowerment. Her imagery work has helped thousands of people unleash their potential. It is used in business, relationships, health, parenting, or for personal growth issues.

Eidetic Imagery is a unique and transformative mind/body technique; a powerful, holistic system that allows an individual to recall personal, symbolic images formed by past experiences. These images are spontaneous, and when tapped, are vivid and real, producing a physiological response that quickly generates shifts in perspective offering insight into unrealized inner abilities.

HOW IMAGERY HEALS OUR LIVES:

We all have hidden images within us; images from birth that are as unique as our fingerprints. Throughout our lives we receive messages, continuously forming a sense of self whose picture reveals much about our conscious life and the myriad issues we face. In the process of living, our wholeness may become hidden and we have to unearth our untainted identity to reveal our true essence.

Sussman helps individuals tap into these potent states of being and utilize them to transform problematic attitudes and behaviors about ourselves and others. With Eidetics, we access parts of our consciousness to discover powers, talents, abilities and solutions to problems. We learn to excel in new ways, unblocking hindrances to success and healing.
